Claims 1-17 are generic to a plurality of disclosed patentably distinct species comprising a zinc sulfide phosphor precursor (claim 18), a halophosphate phosphor precursor (claim 19), a phosphate phosphor precursor (claim 20), a silicate phosphor precursor (claim 21), a tungstate phosphor precursor (claim 22), an aluminate phosphor precursor (claim 23), a rare earth activated alkali metal halide precursor (claim 24) and a rare earth activated alkaline earth metal fluorohalide phosphor precursor (claims 26-33). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (one of the above set of claims), even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Claims 1-17 will be examined with the elected species claim.

A telephone call was made to D. Lucas on 6 December 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melissa Koslow whose telephone number is (571) 272-1371. The examiner can normally be reached on Monday-Friday from 8:00 AM to 3:30 PM.
